

# Next-Generation Endpoint Security is a Smarter Cybersecurity Solution

## Smarter Detection

- » Behavior-based, not signature-based
- » One of its kind, cloud-based, predictive protection

## Smarter Remediation

- » Rollback remediation automatically undoes changes made by malware
- » No need to reimage or wipe devices

## Smarter Management

- » No signature updates
- » Minimal user performance impact
- » All endpoints protected collectively & managed centrally

## Smarter Threat Intelligence

- » Data from tens of millions of sensors is correlated and analyzed continuously
- » Machine-learning backs highly accurate real-time analysis of URLs, IPs, files, mobile apps, and phishing sites

## Smarter Protection

- » Collective protection—strength in numbers
- » Any time a Webroot-protected device encounters a threat, all other endpoints are secured in real time

## Smarter Incident Response

- » 40+ commands for one endpoint or many
- » Integrates with firewalls, access points, MDMs, and more to make security products smarter

## Smarter Support

- » One-click support
- » Most problems resolved in 10 minutes or less
- » Customer satisfaction rating of over 94%

## Smarter Future

- » Tiny <1 MB agent designed for minimal footprint
- » Covers ATMs, point of sale, automobiles, embedded systems, and integrates for IoT security
- » Top industry performance
